

Goal, Performance Objectives, Targets and Policies

Goal	Broad purpose statement
Performance Objectives	Desired outcomes
Targets	Measurable progress
Policies	Program strategies

Goal: Develop and maintain an integrated multi-modal transportation system to provide safe travel for all users, the efficient movement of goods and services, and to promote livable communities and economic activity.

Safety	Performance Objectives, Targets and Policies
S1	Safe and fatality-free travel conditions on Polk County roads.
Target	By 2040, eliminate traffic fatalities on Polk County roads.
Target	Annually reduce traffic fatalities and severe injuries. Measure by three-year rolling average: Average traffic fatalities 2012-14 = 96 Average severe injuries 2012-14 = 465

Target	Annually reduce traffic fatalities and severe injuries from crashes involving heavy vehicles. Measure by three-year rolling average: Average traffic fatalities 2012-14 = 12 Average severe injuries 2012-14 = 26
Target	Annually reduce pedestrian fatalities and severe injuries Measure by three-year rolling average: Average traffic fatalities 2012-14 = 15 Average severe injuries 2012-14 = 32
Target	Annually reduce bicycle fatalities and severe injuries Measure by three-year rolling average: Average traffic fatalities 2012-14 = 4 Average severe injuries 2012-14 = 8
Policy S1.1	Implement the Complete Street Policy adopted in 2012 to provide safe travel for all users regardless of their age or abilities; support all modes of travel and travel choices; provide convenient access to community land uses; and help create a sense of place and livable communities.
Policy S1.2	Analyze “high crash corridors” to identify and implement operational and design improvements to reduce traffic crashes.
Policy S1.3	Develop, maintain and implement pedestrian and bicycle safety action plans.
Policy S1.4	Support implementation of non-engineering solutions to improve travel safety, e.g., community education and law enforcement.
Policy S1.5	Participate in the implementation of the Florida Department of Transportation’s Strategic Highway Safety Plan.
Policy S1.6	Educate the traveling public regarding the safe practices, rights and responsibilities of motorists, bicyclists and pedestrians.
S2	Safe and secure travel conditions on public transportation.
Target	Maintain zero traffic-related fatalities on public transportation system.
Target	Annually reduce injuries and accidents/incidents on public transportation system. Measure by three-year rolling average: Average injuries 2011-13 = 5 Average accidents/incidents 2011-13 = 2
Policy S2.1	Coordinate with transit providers to identify, prioritize and fund measures to enhance safety and security of transit vehicles, transit stops and inter-modal passenger facilities.
Policy S2.2	Implement a funding set-aside for transit safety and security measures.
Mobility	Performance Objectives, Targets and Policies
M1	Maintain stable flow of traffic on major roads – roads that serve intercity travel and the movement of freight (arterial roads)

Target	Average peak hour travel conditions on arterial roads less than 0.75 volume-to-capacity (v/c) ratio. Note: 0.75 v/c ratio is a rough equivalent for the lower threshold of LOS "C" 2015 Estimate: Average v/c ratio on arterial roads = 0.55
Target	Less than 10% centerline miles congested (LOS "D") or severely congested (LOS "E" or below) during peak hour of travel 2015 Estimate: % miles congested = 5% (21.13 centerline miles) % miles severely congested = 1% (3.96 centerline miles)
Policy M1.1	Implement a congestion management process that meets federal and state requirements and maximizes the safety and efficiency of the existing transportation system.
Policy M1.2	Identify and fund complete street projects to increase mobility and improve safety to include intersection, intelligent transportation system, supplemental resurfacing features, transit, bicycle and pedestrian improvements.
M2	Maintain stable flow of traffic on the Freight Network
Target	Less than 10% centerline miles congested (LOS "D") or severely congested (LOS "E" or below) during peak hour of travel 2015 Estimate: % miles congested = 5% (22.98 centerline miles) % miles severely congested = 1% (2.96 centerline miles)
Policy M2.1	Identify significant freight corridors, to include the Florida Strategic Intermodal System (SIS) highways and major distribution centers in Polk County, as the TPO Freight Network.
Policy M2.2	Identify freight hot spots – discrete areas on the transportation network where the movement of freight is impeded by physical or operational deficiencies. Program improvements to correct these deficiencies.
Policy M2.3	Identify long-term network improvements to enhance the efficient movement of freight and intermodal connectivity.
M3	Provide transportation options for intercity and local travel.
Target	Provide fixed-route transit service to all municipalities in Polk County. 2015: 14 of the 17 cities are currently served by fixed-route transit.
Target	Provide regional multi-use trail connections to all municipalities in Polk County. 2015: 6 of the 17 cities are currently connected to a regional multi-use trail.
Policy M3.1	Provide more frequent and convenient transit services that extend to both urban and rural areas of the county.
Policy M3.2	Promote increased commuter participation in ride sharing, carpooling, and vanpooling programs.

Policy M3.3	Conduct mobility audits to ensure public transportation services are accessible to all users, including young, elderly, disabled, transportation disadvantaged, and traditionally underserved populations.
Policy M3.4	Prioritize and fund transportation improvements that promote a seamless transportation network, e.g., intermodal centers, sidewalk connections, traveler amenities and way finding materials.
Policy M3.5	Maintain a component of the long-range transportation plan that identifies proposed improvements to the regional transportation system in Polk County and coordinate with regional transportation partners on the implementation of these projects.
M4	Provide access to the Regional Multi-Use Trails Network
Target	90% of Polk County population within five miles of the Regional Multi-Use Trails Network (Within three miles = 80%) 2015 Estimate: % population within five miles of regional multi-use trail = 73% (Within three miles = 53%)
Target	40 continuous miles on the Regional Multi-Use Trails Network 2015 Estimate: 23 continuous miles on the Regional Multi-Use Trails Network
Policy M4.1	Define a Regional Multi-Use Trails Network to include paved, multi-use trails serving more than one community and connecting to statewide trails.
Policy M4.2	Identify and prioritize gaps in the Multi-Use Trails Network to increase community and resident access to the network.
Policy M4.3	Include funding for multi-use trails as part of the TPO Complete Streets Program.
Policy M4.4	Conduct multi-use trail feasibility studies to support the expansion of the Multi-Use Trails Network and to maximize local, state and federal investments in trail improvements.
Sustainable Resources	Performance Objectives, Targets and Policies
R1	Maintain highway infrastructure in a state of good repair.
Target	Maintain an average pavement condition rating of 6 or better on arterial and collector roads. 2015 Estimate: State Highway System Ratings: Cracking = 9; Ride = 8; and Rutting = 9 County Road System: Pavement Condition Index = 6.55
Target	Maintain a public bridge network with less than 1% of bridges classified as structurally deficient. 2015 Estimate: 0% of bridges are currently classified as structurally deficient.
Policy R1.1	Ensure the financial element of the long-range transportation plan includes sufficient funding for the maintenance of the existing transportation system.

Policy R1.2	As necessary, prioritize bridge rehabilitation and replacement projects as part of the TPO's annual priority setting process.
Policy R2.1	Coordinate with freight stakeholders to identify and prioritize bridge improvement projects.
R2	Minimize environmental impacts from transportation projects.
Target	Limit impacts to jurisdictional wetlands or critical habitat to less than 5% of the total footprint or acreage for transportation projects. 2015 Estimate: In previous five years, the Florida Department of Transportation and Polk County has impacted 149 acres of wetland and critical habitat. This represents 13% of the total acreage or footprint for capacity road projects during that period.
Target	Meet or exceed National Ambient Air Quality Standards in Polk County.
Policy R2.1	Employ the Efficient Transportation Decision Making (ETDM) process to screen for and avoid natural, physical, cultural, and community impacts.
Policy R2.2	Coordinate with Polk County and participate in the development of a countywide Habitat Conservation Plan to protect and enhance threatened and endangered species habitat and to provide an opportunity for successful mitigation strategies where environmental impacts are unavoidable.
Policy R2.3	Use the redevelopment of existing transportation infrastructure as opportunities to restore or improve the function of natural systems where practical.
Policy R2.4	Avoid transportation corridor alignments that fragment environmentally sensitive features such as wildlife corridors, parks, trails, marshes or wetlands.
Livability	Performance Objectives, Targets and Policies
L1	Provide travel options for persons of all ages and abilities.
Target	50% of Complete Street Network with bicycle facilities 2015 Estimate: 35% of the Complete Street Network has bicycle facilities
Target	50% of Complete Street Network with sidewalks 2015 Estimate: 38% of the Complete Street Network has sidewalks (at least one side of road)
Target	Overall average Transit Connectivity Index (TCI) score of 175 for Polk County Census block groups. 2015 Estimate: The current countywide average is 137. The average for Census block groups with at least minimal fixed-route coverage is 178.
Target	75% of senior residents (age 65+) with high or moderate access to fixed-route transit services based on the Transit Connectivity Index 2015 Estimate: 45% of seniors have a high (16%) or moderate (29%) level of access to fixed-route transit services

Policy L1.1	Coordinate with member local governments to identify complete street coverage, i.e., percent network with sidewalks and bicycle facilities, at a community level.
Policy L1.2	Use the set-aside of funding for complete streets to leverage local government investment in complete street projects.
Policy L1.3	Prepare recommended traffic study requirements for new development that place an emphasis on the provision of complete streets, connectivity and access to transit.
Policy L1.4	Participate in the development of community strategies to support aging in place and senior mobility.
Policy L1.5	Partner with Polk Vision and other stakeholders to identify and implement transportation projects that support the Building a Healthier Polk Initiative.
L2	Provide transportation infrastructure and services that support livable communities and ensure mobility for all residents.
Target	100% sidewalk coverage within one mile of elementary, middle and high schools (sidewalk on at least one side of collector or arterial roads) 2015 Estimate: Pilot project is underway to measure sidewalk coverage in vicinity to schools.
Target	Mobility Index score of 10 or greater in neighborhoods with a concentration of traditionally underserved populations 2015 Estimate: Neighborhood mobility audits are currently being performed.
Policy L2.1	Evaluate sidewalk coverage within one mile of schools and identify priority candidate projects to eliminate sidewalk gaps.
Policy L2.2	Conduct mobility audits to assess transit access, walking and bicycling conditions in traditionally underserved neighborhoods.
Policy L2.3	Ensure the long-range transportation plan is consistent with government comprehensive plans to the maximum extent feasible.
Policy L2.4	Support the implementation of Polk Vision and other community strategies to enhance livability.
Policy L2.5	Seek to preserve and enhance cultural, social, recreational and aesthetic features that exist along transportation corridors.
Policy L2.6	Recommend as appropriate, context sensitive design solutions such as landscaping, shade treatments, lighting, signage and crosswalk treatments as supported by the community in the development of transportation projects.

Policy L2.7	Identify and adopt “constrained corridors” as part of the long-range transportation plan where the addition of two or more through-lanes is not practical due to physical, environmental or policy constraints. Pursue appropriate complete street projects to maintain and improve mobility in these corridors.
Policy L2.8	In evaluating consistency with the long-range transportation plan, the TPO shall consider the project description – termini, project features and number of lanes – as well as the goal and objectives of the long-range plan.
Economy	Performance Objectives, Targets and Policies
E1	Provide transportation infrastructure and services that support economic vitality and job creation.
Target	Annually secure at least one grant or special funding allotment for transportation projects that support the expansion of an existing business or the location of a new business. 2015 Estimate: Two such grants were awarded in 2014.
Policy E1.1	Strengthen partnerships with economic development agencies, industry representatives and businesses to gain a better understanding of existing and future transportation needs.
Policy E1.2	Prioritize transportation investments that support economic development and job creation.
Policy E1.3	Maintain a component of the long-range transportation plan that identifies future road improvements to improve land access, especially for planned employment centers.
